## EXPERIENCE

### Associate Software Engineer

#### The One Technologies

08/2024 - Present Ahmedabad, India

https://theonetechnologies.com/

**The One Technologies** is a Software Development company that provides custom web, mobile, and enterprise solutions. It offers modern, cost-effective digital services—including app development, UI/UX design, SEO, and e-commerce—that help businesses grow and effectively engage their users.

- Developed and maintained responsive UI components using **React.js** and **Next.js** for multiple client projects.
- Integrated **RESTful APIs** to display and manage dynamic data across **10+** pages and modules.
- Collaborated with a team of developers using **Git** for version control and conducted code reviews to ensure clean and maintainable code.
- Improved frontend performance and load time by **20–30%** through optimization techniques such as lazy loading and efficient state management.

## EDUCATION

## PROJECTS

### E-COMMERCE WEBSITE

An e-commerce platform with core features like product browsing, cart management, and secure checkout.

- Developed a full-featured E-commerce platform using the **MERN stack** (MongoDB, Express.js, React, Node.js), supporting product browsing, secure checkout, and responsive design.
- Implemented a robust **admin dashboard** for managing products, inventory, orders, and tracking sales performance.
- Integrated key features like **payment gateway support**, intuitive product categorization, and seamless order management to enhance the shopping experience.

# PROJECTS

---

## PORTFOLIO WEBSITE

 <https://jay-mathasoliya-portfolio.vercel.app/>

Created a responsive portfolio website using Next.js and Tailwind CSS.

- Developed a fully responsive and dynamic personal portfolio to showcase skills, experience, and projects.
  - Implemented smooth UI animations and transitions using Framer Motion for enhanced user engagement.
  - Designed with a focus on performance, accessibility, and modern frontend architecture.
  - Integrated Git for version control and deployed the site using modern hosting solutions.
  - Demonstrated expertise in component-based design, responsive layout, and SEO-friendly practices.
- 

## FACEBOOK CLONE

A social media website replicating features akin to Facebook

- Designed and developed Facebook clone social media website using MERN Stack
  - Implemented user authentication, registration, and feed for viewing posts
  - Features include post creation, like/dislike posts, follow/unfollow friends, and responsive design
- 

## NEWS APP

An application aggregating news articles from various domains

- Created an app for reading the latest news across multiple categories
  - Integrated features using Node.js, React.js, and Bootstrap
  - Utilized News API for live updates
-
